LakeLife

SOCIAL MEDIA PLAYBOOK

Useful posts. Clear invitations. A familiar brand.

A four-week calendar, twelve captions and six reusable graphics.

INTERNAL / MARKETING

Prepared 17 October 2026

LakeLife.ai

01 / BRAND AND MESSAGE

Sound like someone who keeps track.

Warm, local and specific. Make each post useful on its own. Lead with the person's property or question, then explain one benefit and one next step.

PILLAR	USEFUL SUBJECTS	PROOF TO SHOW
Owner clarity	Rent records, shared costs, office workflows.	A real workflow with synthetic or permission-cleared data.
Resident confidence	Bill breakdown, receipts, where to ask, reported issues.	Plain instructions for participating parks.
Visible work	Service scope, completion photos, approved changes.	Original service artwork or permitted real job evidence.
Seasonal readiness	Planning opening/closing, piers, lifts and home care.	Actual local availability and lake conditions.

Use

"Review the total before you book."
"Ask your office to review the record."
"See whether it fits your park."

Avoid

"Guaranteed savings."
"Every park can collect rent online."
"No more work for your office."

> Do not show resident names, balances, addresses, access codes or payment details in public screenshots. Label demonstrations "Example"; use real customer quotes and job photos only with permission.

02 / CHANNEL ROLES

Keep the weekly rhythm manageable.

Facebook	Primary local education and owner conversation channel. Use a business page; ask group administrators before posting in community groups. A direct relevant question is more useful than repeated promotion.
Instagram	Show the brand, service illustrations, short walkthroughs and permitted work evidence. Use captions and readable on-screen text so video still makes sense without sound.
Stories	Two short updates a week: one helpful explanation and one invitation. Repeat the most useful guide step. Use a website link only where the account supports it.
Short video	One useful demonstration every other week. A calm 20-30 second explanation can answer a question better than a feature list.
Local newsletters	Offer a short owner or homeowner paragraph to association editors. Follow their placement rules and obtain permission; do not imply endorsement.

Suggested starting cadence

Three feed posts per week for four weeks, two stories per week, and two short videos across the month. Reduce frequency if support or production quality suffers.

CTA routing: park owners → LakeLife.ai/for-parks; homeowners → LakeLife.ai; current renters → their participating park office and office-issued account instructions. Do not publicly post a resident claim code.

The supplied 1080 × 1080 graphics are a simple reusable square format, not a claim about every channel's current preferred dimensions. Preview each platform crop before posting.

03 / FOUR-WEEK CALENDAR

Twelve posts. One clear path.

DATE	AUDIENCE	MESSAGE / ASSET
10-19	Park owners	Your park, in one place / 01
10-21	Renters / participating parks	Know what is on your bill / 02
10-23	Lake homeowners	Ready for the season ahead / 03
10-26	Park owners	Shared costs, clearly recorded / 04
10-28	Owners and homeowners	See the work record / 05
10-30	Park owners	Start with your park / 06
11-02	Park owners / office leads	Make the office part of the start / 06
11-04	Park owners	Three questions for your next walkthrough / 01
11-06	Lake homeowners	Review the total before you book / 03
11-09	Renters / participating parks	A payment report is a record / 02
11-11	Renters / participating parks	Know where to ask / 02
11-13	Park owners	See whether it fits / 06

Suggested posting days are Monday, Wednesday and Friday, 19 October-13 November 2026. Publish at a time the team can answer inquiries. Use actual audience results to choose later posting times; there is no assumed “best hour.”

> **Optional short tags:** #LakeLife #IndianaLakes. Add the relevant lake name when the post is truly about that location. Keep tags secondary to the message.

04 / READY-TO-USE CAPTIONS

Week 1 / Oct 19-23

01 / 2026-10-19 · Park owners

Your park, in one place

Park owners: what is owed, and what still needs doing? LakeLife brings rent records, shared costs and property work into one place. Start with a walkthrough of one billing period and one property task. See whether it fits your park at LakeLife.ai/for-parks.

Visual: Graphic 01: owner headline, original mark and waves.

02 / 2026-10-21 · Renters / participating parks

Know what is on your bill

At a participating park, LakeLife gives you a place to see your bill, its breakdown and recorded payments. If something looks wrong, ask your park office to review it with you. Your office can help you get connected to your own account. Learn about LakeLife at LakeLife.ai.

Visual: Graphic 02: bill clarity; clearly labeled for participating parks.

03 / 2026-10-23 · Lake homeowners

Ready for the season ahead

Getting the lake house ready for the next season starts with a clear plan. LakeLife helps coordinate seasonal home care, piers and lifts, boat care, lawn care and housekeeping around Big Long, Pretty and Big Turkey Lakes. Ask about service availability and review the total before booking at LakeLife.ai. Dates depend on the service, crew and lake conditions.

Visual: Graphic 03: original house illustration and homeowner tagline.

Prepared copy. Confirm the feature, local service availability and destination link before publishing. Posts have not been published or scheduled.

05 / READY-TO-USE CAPTIONS

Week 2 / Oct 26-30

04 / 2026-10-26 · Park owners

Shared costs, clearly recorded

When a park shares a cost across lots, the record should explain where the amount came from and how it was allocated. LakeLife helps owners keep shared costs and lot records together. Bring one example from your park to a walkthrough at LakeLife.ai/for-parks.

Visual: Graphic 04: a clear cost-sharing message.

05 / 2026-10-28 · Owners and homeowners

See the work record

A finished job needs a useful record. LakeLife requires the service's completion photos before a job can count as complete. Owners and homeowners can keep the service details and work evidence together. See the workflow at LakeLife.ai.

Visual: Graphic 05: original service artwork with completion-photo headline; no fabricated job photos.

06 / 2026-10-30 · Park owners

Start with your park

You do not need to imagine the whole rollout at once. Start with one billing period and one property task. A LakeLife walkthrough covers your lots, your existing process and the support your office and residents will need. Ask for a walkthrough at LakeLife.ai/for-parks.

Visual: Graphic 06: clear walkthrough invitation, logo and waves.

Prepared copy. Confirm the feature, local service availability and destination link before publishing. Posts have not been published or scheduled.

06 / READY-TO-USE CAPTIONS

Week 3 / Nov 2-6

07 / 2026-11-02 · Park owners / office leads

Make the office part of the start

A useful park rollout starts with the people who run the office. LakeLife setup includes reviewing the lot record and starting balances before residents are invited. Bring your office lead to a walkthrough so the first workflow makes sense for everyone. LakeLife.ai/for-parks.

Visual: Reuse Graphic 06; add a story with the three setup steps.

08 / 2026-11-04 · Park owners

Three questions for your next walkthrough

What is owed? What is the shared cost based on? What work still needs attention? Those are three useful places to start a LakeLife walkthrough. Bring a real question from your park, and see how the record is organized. LakeLife.ai/for-parks.

Visual: Use the 20-second owner reel script on page 9; Graphic 01 can be the cover.

09 / 2026-11-06 · Lake homeowners

Review the total before you book

A clear service starts with a clear scope and total. With LakeLife, review one all-in service price before booking. If the crew proposes a profile correction that affects the price, the homeowner must approve it before it changes the profile or billing. Explore local service options at LakeLife.ai.

Visual: Reuse Graphic 03; place price explanation in the caption rather than tiny artwork text.

Prepared copy. Confirm the feature, local service availability and destination link before publishing. Posts have not been published or scheduled.

07 / READY-TO-USE CAPTIONS

Week 4 / Nov 9-13

10 / 2026-11-09 · Renters / participating parks

A payment report is a record

Already paid your park office? At a participating park, LakeLife lets you report that payment so the office can review and confirm the record. Reporting a payment does not send money. Keep using your park's stated payment method unless your account clearly offers an enabled online option. Ask your office if you are unsure.

Visual: Graphic 02 plus the full explanation in caption; no generic Pay Now button.

11 / 2026-11-11 · Renters / participating parks

Know where to ask

Have a question about a charge or a reported repair? Your park office is the first place to ask. LakeLife keeps your own bill and reported-issue status available in one place at participating parks. If your park has installed a LakeLife reporting sticker, follow its instructions; otherwise ask the office to log the issue.

Visual: Graphic 02; use story text for office help. Do not invent a park contact or QR sticker.

12 / 2026-11-13 · Park owners

See whether it fits

A good next step should be easy to understand. Show us one billing routine and one property task at your park. We will walk through how LakeLife keeps the record and what setup would involve, so you can decide whether it fits. Start at LakeLife.ai/for-parks.

Visual: Graphic 06 with a direct owner invitation.

Prepared copy. Confirm the feature, local service availability and destination link before publishing. Posts have not been published or scheduled.

08 / SHORT VIDEO SCRIPTS

Show one useful moment.

Owner reel / about 20 seconds

TIME	VISUAL	VOICE / ON-SCREEN WORDS
0-4s	Original logo on deep water blue.	“What is owed, and what still needs doing?”
4-10s	Three readable title cards; no real resident data.	“LakeLife brings rent records, shared costs and property work into one place.”
10-16s	Founder speaking or a labeled example workflow.	“Start with one billing period and one task at your park.”
16-20s	Graphic 06 / website.	“Ask for a walkthrough at LakeLife.ai.”

Homeowner reel / about 25 seconds

TIME	VISUAL	VOICE / ON-SCREEN WORDS
0-5s	Original house, pier and boat artwork.	“What does your lake home need next?”
5-12s	Readable service name and illustrative price-review step.	“Choose the service and review the total before you book.”
12-19s	Original artwork or a permitted completed job.	“Keep the details and completion photos with the work record.”
19-25s	Original logo and LakeLife.ai.	“Explore local services at LakeLife.ai.”

> Use your own voice or properly licensed audio. Add captions. Demonstration screens must be labeled “Example”; never invent a completed job or customer endorsement.

09 / REPLIES AND QUESTIONS

Answer the question. Make the next step clear.

“How much is it?”	For owners: “The park fee depends on the agreed setup and eligible lots. A walkthrough gives us what we need to put the price and scope in writing.” For homeowners: “Review the service total before booking; property details and service availability matter.”
“Can I pay rent?”	“That depends on your park’s setup. Your account shows the options available to you. If online payment is not enabled, keep paying the office using its stated method.”
“Is this for my park?”	“LakeLife starts with a park-owner walkthrough. Your office can tell you whether your park is participating and how to connect to your own account.”
“My bill is wrong.”	“Please ask your park office to review your account with you. Avoid posting your address, balance or payment details here.” Move account-specific help to the actual support route.
“When can a crew come?”	“Availability depends on the service, property and crew schedule. Visit LakeLife.ai to discuss the job. A date is confirmed only when it is scheduled.”
“How do I report a repair?”	“Use your park’s installed LakeLife reporting sticker if one is available, or ask the office to log the issue. For an urgent hazard, use the park’s urgent contact procedure.”

> Reply only with verified account-independent facts in public. Do not discuss a resident’s balance, tenancy or payment status in comments.

10 / PRODUCTION AND MEASUREMENT

A repeatable hour each week.

STEP	ACTION
15 min / choose	Pick the week's three posts. Verify service readiness and the link. Choose the audience before adapting the words.
20 min / prepare	Use supplied artwork; keep original colors, fonts and wave motif. Add alt text from the caption file. Preview the crop on a phone.
10 min / check	Read every claim, date and CTA. Confirm consent for photos or quotes. Have one person check spelling and readability.
15 min / review	Log qualified inquiries, walkthrough bookings and questions. Note what confused people. Set next week's message from those questions.

Measure

- Qualified inquiries by post and audience.
- Owner walkthroughs booked and completed.
- Useful renter questions resolved by the office.
- Service inquiries that become completed jobs.

Learn

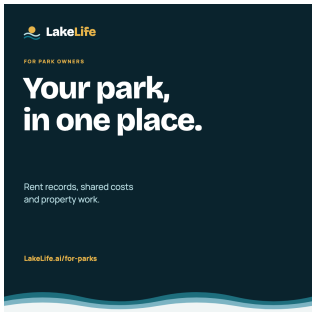

- Which problem gets a real response?
- Does the CTA reach the right place?
- Which message attracts the wrong audience?
- Does the team have capacity to follow up?

Reach, likes and saves can help diagnose distribution, but they do not prove adoption. Keep owner and homeowner results separate, and avoid treating renter help questions as sales leads.

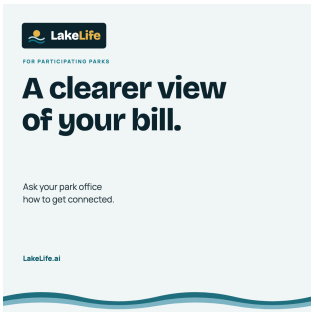

> Use social-calendar.csv to prepare posts and campaign-tracker.csv to log results. The first four weeks are drafted; later weeks should reflect what actual conversations teach.

11 / SUPPLIED ARTWORK

Six graphics, ready for your next post.

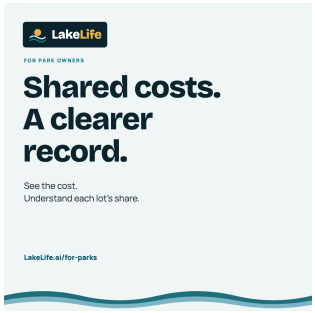

01 / Park owner

02 / Renter clarity

03 / Homeowner

04 / Shared costs

05 / Work record

06 / Walkthrough

Format	Six 1080 × 1080 PNG images. Reuse the original brand mark, wave artwork and service illustrations. Editable compositions are supplied in social/social-artwork.html.
How to post	Pair the image with its full caption and alt text from social-calendar.csv. Keep supporting details in the caption rather than shrinking them into the graphic.
How to adapt	Change the headline and CTA within the same layout. Keep deep water blue, teal, gold, Bricolage Grotesque and Manrope. Review long copy for overflow.

Artwork is original LakeLife prototype artwork reused in branded compositions. The posts describe workflows and invitations; no customer photos, invented testimonials or unverified performance statistics are included.
